Siva Sagar Kancham

Agentic AI & Backend Engineer

+919573724224 | sivasagar2103@gmail.com | Proddatur, Andhra Pradesh, 516360, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Agentic AI & Backend Engineer with 3+ years of experience, building cloud-native, FinOps, and operational intelligence platforms for enterprise environments. Experienced in designing and deploying agentic systems, MCP-based services, backend APIs, and distributed systems using Python, FastAPI, LangGraph, LangChain, FastMCP, AWS, and Azure. Proven ability to take products from architecture to production, with expertise in multi-cloud cost optimisation, resource governance, database observability, and enterprise automation. Focused on building scalable, reliable systems that reduce operational complexity and improve engineering efficiency.

TECHNICAL SKILLS

Programming Languages	:	Python3, Java
Frameworks	:	Fast API, LangChain, LangGraph, FastMCP, OpenTelemetry
Database Management	:	MySQL, MongoDB, Clickhouse, Redis
ORM tools	:	SQLAlchemy, PyMongo, clickhouse driver
Cloud SDKs & MCP Servers	:	boto3 [AWS], Azure SDK for Python, msmcp-azure
Development Tools	:	Git, GitHub, Postman, Docker, RabbitMQ, Docker Compose, Kubernetes, Kombu, aiopika
LLM Platforms	:	Microsoft Foundry, OpenAI

WORK EXPERIENCE

Engineer - Products (dZSuite), Digi Edze Soft Solutions Private Limited, Hyderabad, Telangana, India **Jan 2026 — Present**

- Built an agent-based automation platform and centralized MCP server from scratch to automate cloud infrastructure workflows, covering 60% of L1/L2 operations and reducing manual incident triage time by 40%, with human approval for high-impact actions.
- Pioneered a centralized **Token Economics** platform for Claude AI, Claude API, and Microsoft Foundry, enabling token consumption tracking, model-level cost attribution, usage analytics, budget/quota controls, and policy-driven governance for enterprise AI workloads.
- Architected scalable backend services for authentication, authorization, multi-tenant organization management, and policy-driven resource governance, accelerating platform onboarding by 65%.

Software Engineer, Infolob Solutions India Private Limited, Hyderabad, Telangana, India **Aug 2025 — Jan 2026**

- Implemented a **LangGraph**-based Intent & Context Resolution workflow using application tools for grounded LLM responses.
- Experimented with multiple approaches for **human-in-the-loop** to handle high risk tasks and ensure safe automation.

Software Engineer, Heeddata India Private Limited (Multi-Cloud FinOps Product), Hyderabad, Telangana, India **Jul 2023 — Jul 2025**

- Reduced cloud costs by **25%** by developing an **anomaly detection system** with predictive analytics and automated thresholds, enabling real-time monitoring of cost spikes, security risks, and idle resources.
- Improved MongoDB performance by **30%** under high write loads while conducting a **POC** through **replica set** optimization, targeted indexing, query tuning, and balanced workload distribution.
- Accelerated large-scale Parquet/CSV data processing using **multi-threading** and optimized memory management, increasing CPU efficiency by **40%** and reducing memory footprint by 25%.
- Automated **currency conversion** using ExchangeRates API, removing manual errors and eliminating third-party costs with scheduled rate updates and validation checks.
- Built a real-time **partner dashboard** with a scheduler–worker model, integrating data visualization, RBAC, and audit logging to support secure decision-making for **50+** users.
- Secured authentication systems by implementing **OTP** and **OAuth 2.0** (Microsoft, Google), enabling scalable access for **1,000+** users and cutting unauthorized access incidents by **80%.**

Software Developer Intern, Pro Stack Academy, Bengaluru, Karnataka, India **Oct 2022 — Apr 2023**

- Standardized multi-cloud metadata for **50+** accounts using SDKs, improving resource governance and compliance.
- Optimized backend workflows and API performance to handle high concurrency and large-scale data processing.
- Engineered **20+** REST APIs with **Spring Boot MVC**, ensuring enterprise-grade scalability and maintainability.

EDUCATION

Jawaharlal Nehru Technological University (JNTU), Anantapur, Andhra Pradesh, India - *Bachelor of Technology, Electronics and Communication Engineering - (GPA: 8.0/10.0)* **Jun 2018 — Jul 2022**

ACHIEVEMENTS

Best Employee of the Quarter, Heeddata India Private Limited **Oct 2023**

Awarded for expediting high-accuracy client deliverables through cost-optimized cloud solutions.

Agentic AI Foundations Associate (1Z0-1157-26), Oracle University **Jul 2026**

Certified as an Oracle Agentic AI Foundations Associate, strengthening expertise in LangChain, Model Context Protocol (MCP), MCP client-server architecture, agent orchestration, and enterprise application development.

COURSE WORK

- Data Structures and Algorithms (**DSA**)
- Operating Systems (**OS**), Computer Networks (**CN**), Database Management Systems (**DBMS**)
- Object-Oriented Programming (**OOPS**) and SOLID Principles
- Containerization, Orchestration, and Cloud Computing
- Low-Level Design (**LLD**) and High-Level Design (HLD)
- Supervisor & Multi Agent Architecture
- Hugging Face LLM Course
